

ACP ▶ Auto-Cut Pack

Features:

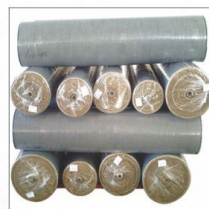

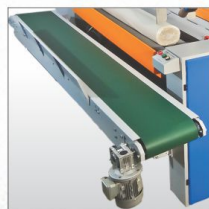

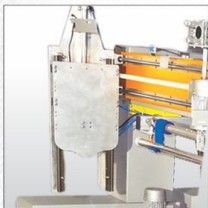

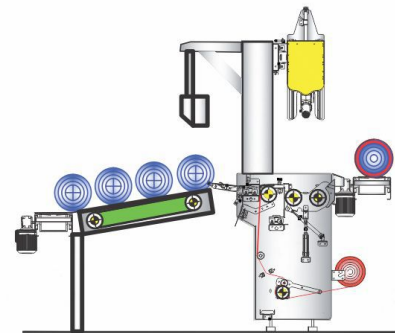

Optional:

ACP is designed with Italian Know-how and ensures quality fabric roll packing with high production of 90 – 120 rolls /hr. It rolls the plastic layer on fabric roll, seals it longitudinally and later German make blowers shrink it to produce presentable rolls.

ACP can be incorporated with number of inspection machine using conveyor system to save manpower and time. This fully automatic packing machine auto reads Fabric Length, Fabric width & Diameter. Double plastic layering, Auto-Ejection, Roll Sorting as per design, customer or length are key features of *ACP*.

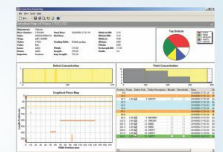

IGS – Inspection and Grading Software

IGS is designed to grade the fabric quality by defect logging as per international 4 Point System. Mapping Module, Optimisation Module and Auto-Cut modules ensures to deliver High 1st Choice fabric, minimise wastage, optimised cutting and reduce labour.
