

BPM-JB ▶ Roll to Batch/Fold

B-TEX' preparation Machine is a combination of small processes to join small fabric rolls to form big batch for processing. With our expertise and years of experience, we are confident of supplying many processes in a single machine. **BPM-JB** can make big batch from small fabric rolls with additional equipment's like Conveyors, Auto-Weighing, Auto-Sewing operation, Inspection Table with Lights, Brushing and Beating Unit, J-Scray with Plaiter & Big-Batch output option. With the possibility of conducting multiple operations in one go it saves lots of space, manpower and time. J-Box allows fabric to keep machine running without halt, as by the time operator is sewing new roll, the fabric in J-box is rolled to make batch, this doubles the production and save manpower.

Features:

Feed Conveyor

Cradle

Auto Sewing

Platform

Variable Speed

Driven Feed Roll

S.S. J-Scray

Driven Scroll Roll

Edge Guider

Surface Big-Batcher

Delivery Plaiter

Italian Geared-Motor

Optional:

Electronic Counter

Inspection Table

Brushing

Beating

Dust Collector
