

BJM ▶ Driven J-Box

BJM J-Box can be used as an independent unit or a part of preparation line, where fabric is to be accumulated and machine should run continuously. It is not mandatory to fix **BJM** on a single machine, with a wheel base it can be easily moved and used on any machine's input or output. Stainless steel sheets ensure fabric care and **BJM** can store up to 200 meters of fabric. 'Specially designed to open Fabric Rolls before lay cutting for Garment Industry'
