

BIM-RR+CD ▶ Roll/Fold to Roll + Cut/Doff

A multifunction inspection machine, with the simplicity of single person operation. **BIM-RR+CD** can Inspect, Measure, Auto-Cut, Auto-Eject and Conveys the presentable fabric rolls to packing, resultant benefit is auto transportation, time savings, educed manpower & space needs, increased production and finally saves costs too. It ensures minimum wastage and high quality delivery of fabric, also tensionless handling for enhanced fabric care, single operator run are some of the additional benefits

Features:

- | | | | | | | | |
|--------------------|--------------|-----------------------|--------------------|----------------------|---------------|-------------------|-----------------------|
| | | | | | | | |
| Inspection | Platform | 600 Dia Delivery Roll | Electronic Counter | Variable Speed | Edge Guider | Dancing Mechanism | Full Length Reversing |
| | | | | | | | |
| Anti-Crease Roller | Illumination | Auto Cutting | Auto Doffing | Italian Geared-Motor | Powder Coated | | |

Optional:

- | | | | | | | |
|-----------------------------|-----------------|---------------------|------------------------|------|------------------|---------------------|
| | | | | | | |
| Data Logging Software (IGS) | Touch Screen | Anti-Slip Mechanism | Variable Roll Hardness | Hood | S.S. Guide Rolls | Rolling Face in/Out |
| | | | | | | |
| Auto Weighing | Conveyor System | | | | | |
